This book, written by Percy Weston at the age of 97, reflects his life and personal experiences with cancer. It is extremely enlightening as it reveals the environmental toxins that have impacted farms around Australia and that Percy believes cause many cancers. Percy gives a detailed description of different cancers and cures he has developed using various minerals, along with case studies accumulated in diaries he has been keeping since 1937. This book is a captivating read from beginning to end. It is also a book that you won't forget. Percy is living proof (he is now over 100 yrs old) of his own healing techniques as he lives on today at his family farm in South Australia. You will come away thinking that current methods of curing cancer are not the answer and of how critical it is to keep eating organic food and growing organic crops during your lifetime.
